JEEVESH BODHANI

Artificial Intelligence and Data Science

Mumbai, Maharashtra-400101 • jeeveshbodhani5@gmail.com • +91-9372031465 • linkedin.com/in/jeeveshbodhani21

B.Tech student in Artificial Intelligence and Data Science (Cumulative CGPA: 9.6) with hands-on experience building real-time computer vision systems, from model fine-tuning through to deployment. Strong foundation in Python, applied machine learning, and structured problem-solving, with a consistent track record across national-level hackathons and case competitions. Adaptable, fast to pick up new tools, and looking for the opportunity to contribute to real, production-scale technology projects.

TECHNICAL & CORE SKILLS

Programming Languages:	Python, C
AI/ML & Computer Vision:	Machine Learning, Deep Learning, Computer Vision, Model Fine-Tuning, Object Detection, Pose Estimation, OpenCV, PyTorch
Data & Analytics:	Data Analysis, Time-Series Forecasting, Data Visualization, SQL, NumPy, Pandas
Systems & Web:	FastAPI, React, REST APIs, Git
Finance & Business Analysis:	Financial Modeling (DCF), Credit Risk Analysis, Company & Market Analysis
Core Strengths:	Critical Thinking, Structured Problem-Solving, On-the-Spot Decision Making, Collaboration, Time Management

DOMAIN-SPECIFIC PROJECTS

KINESIS AI – Real-Time Exam Behaviour Monitoring System *1st Place, Drishti AI Hackathon*

- Built a real-time computer-vision pipeline (person detection, pose estimation, tracking) to monitor exam-hall behaviour from CCTV footage without facial recognition; identity is resolved through camera-calibrated seat position instead of biometric identification.
- Fine-tuned a custom object-detection model on a 25,000+ image dataset, measured at 92% mAP50 against real ground-truth footage, exceeding the base dataset's own published benchmark.
- Applied statistical baseline calibration scoring each student's behaviour against their own individual norm rather than a fixed threshold to meaningfully reduce false-positive alerts, validated across multiple independent test videos and camera environments.
- Designed and built a full-stack product around the model: a FastAPI backend and React dashboard delivering live alerts, evidence review, and role-based access, with every flagged event traced to a specific, human-readable reason rather than an opaque confidence score.

Computer Vision-Based Automated Quality Inspection Pipeline *Hackathon Submission*

- Built an image segmentation and defect-detection workflow using OpenCV and PyTorch to identify surface deformities on production components for QA compliance, flagging defective units in real time on a production line to reduce manual visual inspection.

Predictive Maintenance & Fault Detection System *Hackathon Submission*

- Developed a machine learning model analyzing machine telemetry data (temperature, vibration) to predict equipment breakdowns ahead of schedule, engineering features from raw sensor streams to improve early-warning accuracy.

Production Scheduling & Inventory Optimization Dashboard *Independent Engineering Project*

- Created a data visualization dashboard leveraging time-series forecasting to balance real-time raw material inventory levels and mitigate assembly line bottleneck risks, modeling demand and supply trends to surface early warnings.

PROFESSIONAL EXPERIENCE & SIMULATIONS

JPMorgan Chase & Co. – Investment Banking Job Simulation Jul 2025

- Identified ideal M&A target options for a client based on strict strategic and quantitative financial evaluation criteria; constructed and calibrated a DCF model to compute valuations while adjusting for sudden competitor bids and severe supply chain interruptions.

Goldman Sachs – Risk Management Job Simulation Jun 2025

- Conducted comprehensive credit risk and quantitative analysis utilizing detailed financial datasets to evaluate personal finance implications; applied sharp critical thinking to complex real estate scenarios to assess operational and financial risk.

EDUCATION

Dwarkadas J. Sanghvi College of Engineering – B.Tech, AI & Data Science (Cumulative CGPA: 9.6) Sep 2024–May 2028

Pace Jr. College – HSC Board Examination (Aggregate: 86.67%) May 2022–Feb 2024

Gundecha Education Academy – ICSE Board Examination (Aggregate: 94.1%, Mathematics: 99) May 2022

COMPETITIONS & ACHIEVEMENTS

- **Hackathon Wins (1st Places):** Secured 1st Place at Sathaye College Hackathon building Zenith, 1st Place at HackOut constructing a functional software prototype, 1st Place at PCCOE Hacktopia engineering an innovative solution under a national deadline, and 1st Place at NMFC TechTatva building an ML pipeline to classify X-Ray database faults.
- **Hackathon Wins (Top 3 Finishes):** Secured 3rd Place at PCCOE Craftverse developing the Jarvis Hedge Fund platform and 3rd Place at MPSTME Commit 1.0 delivering a full working technical solution in a fast-paced team build.
- **Case Study Competitions (3 Wins):** Secured top finishes across three major academic/corporate case study competitions, demonstrating sharp logical thinking, structured business analysis, and rapid execution under strict deadlines.

CERTIFICATIONS

Using Machine Learning in Trading and Finance — New York Institute of Finance & Google Cloud (Grade: 100%) Apr 2026

Introduction to Trading, Machine Learning & GCP — Google Cloud & New York Institute of Finance (Grade: 99%) Mar 2026

Introduction to Tech Entrepreneurship — IIT Bombay (Grade: 93%) Jan 2026

Introduction to Front-End Development — Meta (Grade: 92%)

Generative AI Foundations Certificate — Microsoft
